Instructions to complete a digital version of this form: (1) Download a copy to your hard drive; (2) Open the saved blank copy; (3) Fill out the form; (4) Use the Save As command to rename the form appropriately and save; (5) *Print* and submit to SHSND.

Statement of Significance:

Under Criterion A, a site would be considered for the National Register of Historic Places (NRHP) nomination if it can be associated with an event that is significant to history. Site 32MNx763 cannot be associated with such an event; therefore site 32MNx763 cannot be considered eligible under Criterion A.

Under Criterion B a site would be considered eligible if it can be associated with the lives of significant persons in our past. According to the deed search (see table 1), site 32MNx763 cannot be associated with such a person; therefore site 32MNx763cannot be considered eligible under Criterion B.

Under Criterion C, a site could be considered eligible if it:

a) Embodies a distinctive characteristic of a type, period, or method of construction
b) Represents the work of a master
c) Possesses high artistic value
d) Represents a significant and distinguishable entity whose components may lack individual distinction

No features at site 32MNx763 fulfill these requirements. The only evidence of a standing structure is badly deteriorated wood planks. No evidence of walls or roof remains; therefore it is not eligible under Criterion C.

Under criterion D, if a site has yielded or is likely to yield information important to our history or prehistory it could be eligible for the NRHP consideration. Site 32MNx763 is not likely to possess information potential as it is one of many such examples within the area. The integrity of the site is poor. Therefore, Site 32MNx763 is not eligible under Criterion D.
