1. Feature Description, Integrity, Eligibility:

The feature is a one room school moved to this location to be used as a shop. It was placed on a concrete pad. It was originally located 1/4 mile south and 1/2 mile east of the current location. The gable roof of the building is covered with metal sheeting. The exterior chimney is gone but the inside of the school has the red brick chimney on the west wall of the school. A stove pipe leads to the chimney but apparently isn't used anymore. The soffits are open.

The exterior siding begins with a rake board on all sides of the school. The rest of the siding is 6 inch wood lap with 6 inch wood corner trim. The east end of the building had an entry in its original location. The entry was removed and a side sliding door was added. The door has three 4x4 fixed pane windows. There is also a 4 panel wood entry door on the east side. There are three double hung, 2 over 2, windows on both the south and north sides of the school with intact glass. The interior walls are are wallboard. The ceiling is covered with 1 foot by 2 foot tiles with places where sheet rock or wallboard was tacked up. The blackboards remain on the west wall. There is wainscot on the walls. Electricity is present. This school closed in 1953.
